## From The Desk Of Chairman

- After successful completion of 6 years in Life Science Division specially engaged in Molecular Biology, Cell Biology, Contract Research, Services, Production and Manufacturer of extraction PCR related products Training Programme for Student Researchers, Scientists, related different lines of Life Science Research and also Molecular Diagnostic etc., Considering our theme ***"LIFE, MOLECULE BY MOLECULE"*** we have entered in our new mission to open Genelon Diagnostics with a state of art fully automated path services as well in Yelahanka, Bangalore.
- Under the guidance of Molecular Biologists, Pathologists, Microbiologists, Biochemists, Immunologists, Scientists, Haematologists and a team of qualified experienced technocrats used to the most desired respect, support and honour from all our customers of the rarest testing facility of H1N1 in Bangalore.
- It was an immense feeling to start our new Diagnostics division not only for the betterment of the society but also for the services to the mankind through faster mode with uncompromised quality. Like our successful history of Genelon Institute of Life Science Research and Molecular Biology based RT-PCR, Q-PCR, PCR, Flow Cytometry, Cytotoxicity assay and all Cell Based Assays in one world class Mammalian Cell Biology facility and also we have Stem Cell Biology with clean room facility. We are confident of achieving our goal in Diagnostics also.
- Genelon not only has the DSIR Recognition but also has recognition under Rajiv Gandhi University of Health Sciences to carryout PhD courses in the Stem Cell Biology category.
- We are much confident to look forward about the success of Genelon based on our Quality Policy and Commitments.

## MISSION

Our Mission is to Become the Leader of Diagnostics also from the Pioneering work done in Life Science Fraternity in Recent past.

## VISION

- Starting from Molecular Diagnostics extending the routine path services like Biochemistry, Immunology, Pathology, Clinical pathology, Microbiology, Haematology, Serology based We are committed to offer wide range test through Latest Technology empowered by subject expert, aggressive pricing and also cutting edge quality to follow the six sigma concept.
- Not being complacent with DSIR approval and after pioneering work in Life Science but also very much eager to enroll external QC from CMC vellore, AIIMS, NABL, CAP etc..., in near future.
- Since Genelon Diagnostics opens its doors through triangular services of Molecular Diagnostics and also Life Science Researches, So we are very much focused on our goal to achieve to meet the quality parameters as Good Laboratory Practices(GLP).
- We are committed to eradicate the Tropical diseases like Malaria, Chikun gunya, Dengue, all other viruses or other infections dependent diseases from India through Diagnostic and Prognostics tool , which would be totally based on Technology ,Quality and Experienced man power.

| Test code | Test name                                             | Sample type       | Reporting time | MRP  |
|-----------|-------------------------------------------------------|-------------------|----------------|------|
| GI001     | Absolute CD4 count                                    | WB-EDTA           | Same day       | 850  |
| GI002     | Absolute CD4, CD8 count                               | WB-EDTA           | Same day       | 1000 |
| GI003     | Angiotensin converting enzyme (ACE)                   | SERUM             | Same day       | 1000 |
| GM001     | Acid fast bacilli stain (1 Sample)                    | OTHERS/ANY SAMPLE | 1 day          | 200  |
| GM002     | Acid fast bacilli stain (2 Sample)                    | OTHERS/ANY SAMPLE | 1 day          | 200  |
| GB001     | Adenosine deaminase(ADA)                              | SERUM             | Same day       | 450  |
| GM003     | AFB Antibiotic susceptibility -10 drugs               | OTHERS            | 3 Weeks        | 5500 |
| GM004     | AFB Smear                                             | FLUID             | >6Weeks        | 100  |
| GM005     | AFB Culture (automated)                               | OTHERS            | >6Weeks        | 650  |
| GB002     | Albumin                                               | SERUM             | Same day       | 100  |
| GB003     | Alkaline phosphatase                                  | SERUM             | Same day       | 130  |
| GI004     | Alpha feto protein (AFP)-Tumor marker                 | SERUM             | Same day       | 800  |
| GI005     | Alpha feto protein (AFP)-Maternal                     | SERUM             | Same day       | 800  |
| GB004     | Amylase                                               | SERUM             | Same day       | 400  |
| GI006     | Androstenedione (A4)                                  | SERUM             | Same day       | 1800 |
| GCY001    | Anmniotic fluid Karyotyping                           | AMNIOTIC FLUID    | 14days         | 4000 |
| GI007     | Anti Jo-I antibody                                    | Serum             | 2&4&7 days     | 3000 |
| GI008     | Anti Mullerian Hormone (AMH)                          | SERUM             | 1 day          | 1500 |
| GI009     | Anti cyclic Citrullinated peptide antibody (Anti CCP) | SERUM             | 1 day          | 1000 |
| GS001     | Anti Hepatitis A Virus -Total                         | SERUM             | Same day       | 1000 |
| GS002     | Anti Hepatitis E Virus-IgM                            | SERUM             | Same day       | 1200 |
| GS003     | Anti Hepatitis B surface antigen (AHBS) Total         | SERUM             | Same day       | 750  |
| GS004     | Anti Hepatitis B envelope antigen (AHBE) Total        | SERUM             | Same day       | 1000 |
| GS005     | Anti Hepatitis B Core antigen - IgM                   | SERUM             | Same day       | 1000 |
| GS006     | Anti Hepatitis B Core antigen - Total                 | SERUM             | Same day       | 1000 |
| GI010     | Anti microsomal antibody (AMA)                        | SERUM             | Same day       | 1000 |
| GI011     | Anti Nuclear Antibody (ANA)                           | SERUM             | 1 day          | 550  |

| Genelon General Health Checkup:- Blood pressure, ECG, HB, TLC,DLC,ESR, Platelets, FBS/RBS/Urea, Creatinine, Liver Panel (Alkaline Phosphatase, Bilirubin Total, Bilirubin Direct, Bilirubin Indirect, LDH, Albumin, A:G Ratio, Total Protein, SGPT, SGOT, GGT) Lipid Profile Direct (Cholesterol, Cholesterol-HDL-Direct, Cholesterol-LDL-Direct, Triglyceride, VLDL-Calculated, Cholesterol ratio HDL/LDL ratio)                                                                                                                                                                            | SERUM, Na-PLASMA, WB-EDTA, URINE | Same day | 1600 |
| Genelon Super 70: HB, TLC,DLC,ESR, Platelets, FBS/RBS /Urea, Creatinine, Urine Routine Liver Panel (Alkaline Phosphatase, Bilirubin Total, Bilirubin Direct, Bilirubin Indirect, LDH, Albumin, A:G Ratio, Total Protein, SGPT, SGOT, GGT) Lipid Profile Direct (Cholesterol, Cholesterol-HDL-Direct,Cholesterol-LDL-Direct, Triglyceride, VLDL-Calculated, Cholesterol ratio HDL/LDL ratio) Electrolytes (Sodium, Potassium, Chloride), Urine Routine, Uric Acid, TFT, HbA1C, Serum iron+TIBC, PT/INR, S.Calcium, S.Phosphorous, Urine Microalbumin urea Urinary Creatinine, Vitamin-D-25-OH | SERUM, Na-PLASMA, WB-EDTA, URINE | Same day | 5000 |
| Genelon Thallasemia Profile: Ferritin, Iron, Iron Binding capacity-Total (TBIC), CBC, Hemoglobin Electrophoresis                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | SERUM, WB-EDTA                   | Same day | 2000 |
| Hypertension Panel (Urea, Creatinine, Glucose fasting, Electrolytes, Lipid Profile)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | SERUM, Na-PLASMA, URINE          | Same day | 1000 |
| Infectious Profile (Rapid:- HBSAg, HCV,HIV)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | SERUM                            | Same day | 1200 |
| Infectious Profile (ELISA: HBsAg, HCV, HIV1&2)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | SERUM                            | Same day | 1500 |
| Iron deficiency Profile (Ferritin, Iron, Iron binding capacity-Total (TIBC),Transferrin, % Iron Saturation)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | SERUM                            | Same day | 800  |
| Liver panel (Alkaline Phosphatase,Bilirubin total, Bilirubin direct,Bilirubin indirect,Albumin,A:G Ratio, Total protein,SGPT,SGOT,GGT)                                                                                                                                                                                                                                                                                                                                                                                                                                                       | SERUM                            | Same day | 550  |
| Osteoscreen Panel-1(Calcium, Phosphorous, Vitamin D3, PTH Intact)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | SERUM                            | Same day | 2200 |
| Pre-Operative Panel (CBC, Blood Group, Glucose random, HIV 1&2, HBsAg,HCV, VDRL, Urine Routine)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | SERUM, Na-PLASMA, WB-EDTA        | Same day | 1500 |

| Test name                                                                                                                                                                                            | Sample type                      | Reporting time | MRP  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------|------|
| Pregnancy Profile: CBC, Anti Phospholipid IgG & IgM, Torch IgG & IgM (Toxo-IgG, IgM, Rubella-IgG, IgM, CMV-IgG, IgM, HSV 1 & 2 - IgG & IgM) Cardiolipin IgA, IgG & IgM.                              | SERUM, WB-EDTA                   | Same day       | 3000 |
| Prostatic Profile: PSA Total, Free PSA, Ratio of PSA Free/PSA Total                                                                                                                                  | SERUM                            | Same day       | 1200 |
| Quad Marker (AFP, BhCG, E3, INHIABIN A)<br>Renal function test/Kidney panel (CBC,Urine Routine, FBS,BUN,Creatinine,Uric acid, Protein total, Calcium, Electrolyte, Alkaline Phosphatase, Albumin and | SERUM                            | Same day       | 2800 |
| Microalbumin)                                                                                                                                                                                        | SERUM                            | Same day       | 1200 |
| TORCH Panel, IgG Panel(TOXO-IgG, Rubella-IgG, CMV-IgG, HSV 1&2-IgG)                                                                                                                                  | SERUM                            | Same day       | 1000 |
| TORCH Panel, IgM Panel(Toxo-IgM, Rubella-IgM, CMV-IgM, HSV 1&2-IgM)                                                                                                                                  | SERUM                            | Same day       | 1000 |
| TORCH Panel, IgG & IgM (Toxo-IgG, IgM, Rubella-IgG, IgM,CMV-IgG, IgM, HSV 1 & 2 - IgG & IgM)                                                                                                         | SERUM                            | Same day       | 1900 |
| Triple Marker Test / 2nd Trimester Risk Assessment, 14-22 Weeks. (AFP, Beta HCG & E3)<br>** for Tripple Marker Patients DOB, Last USG report, LMP, Dr.'s prescription xerox required                 | SERUM                            | Same day       | 2200 |
| Women wellness panel (HB, TLC, DLC, ESR, Platelets, FBS, and PPBS, Urea, Creatinine, Lipid profile Direct, Liver panel, Thyroid function test and Urine Routine)                                     | SERUM, Na-PLASMA, WB-EDTA, URINE | Same day       | 2000 |

## Ready To Meet Challenges.....

- Genelon Diagnostic Clinical Team and its members are customized approach to Diagnostics and also adaptation of recent Advanced Technology and Trends of Diagnostic Tool Utilization.
- Though we believe in “MAN BEHIND THE MACHINE IS IMPORTANT BUT ALSO CRUCIAL IN RINGING THE SAME TUNE AND WAVELENGTH WITH THE TECHNOLOGICAL UPGRADATION AS WELL”
- Combination of Pathology, Histopathology, Biochemistry, Microbiology, Molecular diagnostics, under the same Roof and Platform has given the extra courage to the work not only through faster mode but also with extra care and valid correlation immediately.
- After engaging in last 6 years DNA, RNA, Gene studies successfully, we are very much confident about our future role in Genelon Diagnostics.

# Highlighting Features Of Genelon Diagnostics

- ✓ “STATE OF ART” Laboratory under the single roof.
- ✓ All Hi-Tech Departments with Experienced and Skilled Technocrats are involved.
- ✓ Compliance of all QC Programmes.
- ✓ DSIR approved and Future goal to enroll NABL and CAP.
- ✓ Cost Effective Health Care Solutions.
- ✓ Reporting TATS is highly acceptable.
- ✓ Molecular Diagnostics Association is an extra age.
- ✓ Plan to go for 24/7 operative in coming one year.
- ✓ To include rarest test in one Testing panel through Q-PCR.
- ✓ To grow with uncompromised quality, service, test menu and aggressive in pricing.
- ✓ Door step sample Pick up Facility (Nurses Availability as on Request).
- ✓ Online Report with Alert.
